

- Accuracy 0.5%, 1.0%
- Temperature Compensated
- Non-Metallic Wetted Parts for Excellent Corrosion Resistance
- Low Pressure Range from 1000 mmH₂O to 6000 mmH₂O
- Zero and Span Adjustments (4-20mA)
- False System Shutdown Prevention

PT 8 Series

HAWK PT8 series pressure transmitters and transducers are designed to measure low pressure from 1000 mmH₂O (100mbar) to 6000 mmH₂O (600mbar) at high quality performance and precision accuracy requirement. The non-metallic wetted parts (the parts contacted with the media directly) design let it use for applications where a typical metallic components could not withstand the process media such as acids, chlorines and etc. Each transmitter is inspected and calibrated to ensure it's 100% quality.

Typical Applications

- Chemical Industrial Engineering
- Chemical Process control
- Chemical Pump applications
- Medical equipments
- Environment protecting equipments
- Oxygen application management
- Other chemical industrial applications

Specifications

PERFORMANCE

Accuracy at 25 C° (Linearity, Hysteresis, Repeatability):

- < ±0.5% F.S....Typical (PT84)
- < ±1.5% F.S....Max (PT84)
- < ±1.0% F.S....Typical (PT85)
- < ±2.0% F.S....Max (PT85)

Stability at 25 C°:

- < ±0.4% F.S./ C° (0/+70 C°)

Thermal Zero Shift:

- < ±0.04% F.S./ C° (-40/+135 C°)

Thermal Span Shift:

- < ±0.04% F.S./ C° (-40/+135 C°)

ENVIRONMENTAL

Operating Temperature Range:

- 0.....70 C° (PVC)
- 25.....85 C° (PVDF)

Storage Temperature Range:

- 25.....85 C°

Compensated Range:

- 40.....135 C°

Weatherproof Rating (Enclosure):

- IP65, NEMA4/4X or better

PHYSICAL DATA

Housing (Case):

- 304 Stainless Steel (316SS Option)

Fitting Materials:

- PVC or PVDF

Ceramic Sensor:

- Aluminum Oxide Al₂O₃ (96%)

Seal Material:

- FPM(Viton), NBR(Buna Rubber), MVQ (Silicone Rubber), CR(Neoprene), EPDM(Ethylene Propylene), FFKM
- Note:** The wetted parts including fitting, ceramic sensor and sealing will be contacted with the media directly, please choose the appropriate material complied to your application.

Process Fitting (Connection):

- 1/2"NPT, 1/4"NPT, G1/2, G1/4, R1/2, R1/4, 7/16-20UNF, M20*1.5, M14*1.0, 9/16-18UNF, Others on request

Electrical Connector:

- Terminal Box to DIN43650 (IP 65)
- Shutter Type Cable (IP 65)
- Flexible Cable (IP 65)
- Female 1/2" DIN (IP 65)

M12 Cable (IP 65)

ELECTRICAL DATA

Voltage Output

Output Signal (Voltage, 3 Wires):
0-10V, 0-5V, 0.5-4.5V, 1-5V, 1-6V

Power Requirement (Voltage):

15-32VDC (Normal 24VDC, Voltage)

Load Resistance(Voltage):

>10K Ohms

Current Output

Output Signal (Current, 2 Wires):
4-20 mA

Power Requirement (Current):

10-32VDC(Normal 24VDC, Current)

Load Resistance (Current):

≤ (Supply Voltage -10V) / (0.02A)Ohms

Media Compatibility and Applications

Media compatibility must be considered when purchasing a pressure transducers and transmitters, Improper selection and application of the pressure transmitters and transducers could possible cause sensor failure and lead to possible damage or personal injury. The media to which the pressure sensors are going to be in contact with, must have compatibility with the Al_2O_3 . In particular the data of weight loss found after a dipping of 80 hours at room temperature in some media have shown a good resistance to HCl (at 30% wt) and HNO_3 (at 60% wt). Therefore the ceramic cell has a very good chemical resistance. But the alumina is instead easily etched by even 1% solution of Fluorine acid (HF). For such applications, you can use HAWK ceramic pressure sensor combined diaphragm seal or the other HAWK Pressure sensors such as stainless steel thin film sensor or diaphragm micro-machined silicon sensor instead. The wetted parts of the transmitter including pressure fitting, ceramic cell and sealing will contact with the media directly. Selecting the suitable pressure fitting material and sealing material is very important.

Please refer to HAWK Corrosion table for detailed information.

Sealing Materials vs Common Applications

Sealing Materials	Common Application Conditions													
	Gasoline, Naphtha	Benzene, Toluene	Aliphatic Hydrocarbon	Alcohol	Ester	Ketones (MEK)	Ethyl Acetate	Water	Organic Acid	Animal/Vegetable Oil	Aromatic Solvent	Oxidized Solvent	High Consistency Alkali	Low Consistency Alkali
Buna N(Nitile), NBR	1	3	5	1	4	4	4	1	4	1	3	5	2	2
Fluorocarbon(Viton), FPM	1	1	2	1	4	2	5	1	5	1	1	5	5	4
Ethylene-Propylene(EPDM), P.C	5	3	5	1	2	1	1	1	5	2	5	1	1	2

Accessories

Accessories

Plug-in Digital Indicator

Digital indicating can be used with the transmitter for your system. It is ideal for all industrial applications when a local pressure reading and a remote signal transmitter to a programmable logic controller or other.

High Level Current Wiring Connecting (4-20 mA 2 wires Loop Power)

The pressure transmitter 4-20mA output units are designed to have current flow in one direction only. The maximum supply voltage for 4-20mA current output transmitter is 32VDC. The minimum supply voltage is dependent upon the loop resistance of the circuit. The load limitation chart shows the minimum supply voltage required for given loop resistance. We suggest that the electrical shield should be connected to the system loop circuit ground to improve electrical noise rejection. For minimum noise susceptibility, avoid installing the transducer and transmitter's cable in a conduit that may contains a high current AC power cables. If possible, avoid installing the cable near inductive equipments.

Limited Warranty and Liability

HAWK GAUGE CO.,LTD warrants all its mechanical instruments to be free from defects in materials and workmanship. HAWK agrees to repair or replace any thermometers if returned to our factory, transportation charges prepaid, and after which examination reveals is to be defective due to faculty workmanship or material. This warrant should not apply to subject to the following terms and conditions:

- A. The product has not been subjected to misuse, neglect, abuse , accident, incorrect mounting, improper use or misapplication such as negligence, accident, vandalism, shock or vibration.
- B. The performance of any system of which HAWK's products are a component part.
- C. The product has not been exposed to any other service, range or environment of greater severity than that for which the products were designed.
- D. The product has not been altered or repaired by anyone except HAWK GAUGE or its authorized service agencies.
- E. The serial number or date code has not been removed, defaced or changed.
- F. The actual pressure&temperature occurring exceed the values specified for HAWK Thermometer.

Unless otherwise specified in a manual or warranty card, or agree to in a writing signed by HAWK GAUGE office, HAWK Thermometer products shall be warranted for one years from the date of sale.

This warranty is in lieu of all other warranties expressed or implied, and of all obligations or liabilities on its part for damages including but not limited to consequential damages, following the use of misuse of instruments sold by it. No agent is authorized to assume for it any liability except as set forth above.

Note

HAWK GAUGE CO.,LTD reserves the right to make product improvements and change its specifications at any time stated throughout this brochure without notification. Please contact the factory on all critical dimensions and specifications for verification.

HAWK GAUGE is not expert in the customer's technical field and therefore doesn't warrant suitability of it's product for the application selected by customer.
